

# solvoprint easy dot 100 PE glossy

Technical Information

## General Information

- > one- sided selfadhesive, white, cadmiumfree 100 µm monomeric PVC- film
- > coated on one side with a solvent-free, age-resistant and permanently elastic acrylate adhesive
- > the "dot-shaped" adhesive coat makes the material easier to handle and to reposition
- > new PE release liner providing excellent flatness
- > glossy surface, printable with eco solvent, solvent and UV-curable inks (low light colours recommended)
- > no chemical reaction between solvent inks and acrylate adhesive
- > a slight surface texture is due to the dot shaped adhesive

### Areas of Application

- > designed for short term indoor applications like Trade Shows, Seasonal Sales etc.
- durability (unprinted) up to 2 years- depending on application area and purpose
- > can be applied to a wide range of substrates, traditionally suitable for adhesion
- > car wrapping is not recommended

## Processing & Handling

- > printing profiles with low amounts of light colours are recommended to reach the best printing performance
- > as with all monomeric films a certain shrinkage can appear depending on the application and inks used
- > easy to remove from nearly all substrates
- > removing from PVC substrates can be more difficult
- > dry gluing without laminating is recommended

### Advantages / Special Features

- > excellent colour reproduction and photorealistic print quality
- very good flatness and printability
- multi-purpose print media (wide printer- and ink spectrum)
- "dot-shaped" adhesive coating allows easy and bubble free positioning
- high flexibility and distensibility
